

Table of Contents

Introduction	i
How To Use This Book	ii

Plastics Joining Processes

Heated Tool Welding - Chapter 1

Process	1
Processing Parameters	3
Materials	4
Weld Microstructure	4
Effects of Ageing on Weld Strength	5
Variants of Hot Tool Welding	5
Equipment	6
Advantages and Disadvantages	6
Applications	7

Hot Gas Welding - Chapter 2

Process	9
Processing Parameters	10
Materials	10
Joint Design	11
Equipment	11
Advantages and Disadvantages	13
Applications	13

Vibration Welding - Chapter 3

Process	15
Processing Parameters	16
Materials	17
Weld Microstructure	18
Cross-Thickness Welding	19
Equipment	20
Orbital Vibration Welding	22
Advantages and Disadvantages	22
Joint Design	24
Applications	25

Spin Welding - Chapter 4

Process	29
Processing Parameters	29
Materials	31
Weld Microstructure	32
Variants of Spin Welding	32
Equipment	32
Advantages and Disadvantages	33
Joint Design	33
Applications	34

Ultrasonic Welding - Chapter 5

Process	35
Processing Parameters	37
Ultrasonic Weldability of Materials	40
Joint Design	45
Ultrasonic Equipment	53
Advantages and Disadvantages	55
Applications	56
Ultrasonic Welding Tips	57
Ultrasonic Inserting	59
Ultrasonic Spot Welding	61
Ultrasonic Staking	61
Ultrasonic Stud Welding	65
Ultrasonic Swaging	65
Ultrasonic Bonding	65
Ultrasonic Slitting	66
Ultrasonic Scan Welding	66
Ultrasonic Degating	66

Induction Welding - Chapter 6

Process	67
Electromagnetic Materials	68
Materials To Be Joined	69
Equipment	69
Work Coil Design	69
Joint Design	71
Advantages and Disadvantages	72
Applications	72

Radio Frequency Welding - Chapter 7

Process	75
Heat Generation	75
Equipment	76
Materials	77
Advantages and Disadvantages	78
Applications	78

Microwave Welding - Chapter 8

Process	79
Processing Parameters	80
Materials	81
Equipment	82
Advantages and Disadvantages	82

Resistance Welding - Chapter 9

Process	83
Processing Parameters	84
Materials	85
Joint Design	85
Equipment	86
Advantages and Disadvantages	86
Applications	86

Extrusion Welding - Chapter 10

Process	87
Processing Parameters	87
Weld Microstructure.....	88
Equipment.....	89
Advantages and Disadvantages.....	89
Applications	89

Electrofusion Welding - Chapter 11

Process	91
Processing Parameters	92
Materials	93
Equipment.....	93
Advantages and Disadvantages.....	94
Applications	94

Infrared Welding - Chapter 12

Process	95
Processing Parameters	96
Materials	97
Microstructure.....	98
Variants of Infrared Welding	98
Equipment.....	99
Advantages and Disadvantages.....	99
Applications	100

Laser Welding - Chapter 13

Process	101
Processing Parameters	102
Materials	103
Weld Microstructure.....	103
Joint Design.....	103
Equipment.....	104
Advantages and Disadvantages.....	104
Applications	104

Mechanical Fastening - Chapter 14

Process.....	105
Machine Screws, Nuts, Bolts, & Washers	105
Self-Tapping Screws.....	107
Molded-In Threads.....	113
Inserts.....	114
Press or Interference Fits	119
Snap-Fits	121
Rivets.....	133
Staking.....	134

Chemical Bonding - Adhesive and Solvent Bonding - Chapter 15

Mechanism of Bonding	137
Types of Adhesives	140
Hot Melt Adhesives.....	140
Acrylic Adhesives	141
Epoxy Adhesives	144
Elastomer Adhesives	145
Types of Solvents	146
Surface Preparation Methods	147
Mechanical Treatments	147
Chemical Cleaning Treatments	148
Surface Modification	148
Electrical Discharge Treatments.....	150
Other Surface Preparation Techniques	151
Factors Affecting Adhesive and Solvent Bonding.....	152
Joint Design	155
Equipment and Application Methods	159
Advantages and Disadvantages.....	160
Applications	162
Adhesive Bonding Tips.....	163

Thermoplastics

Acetal Resin

Acetal Resin - Chapter 16.....	165
Acetal Copolymer - Chapter 17	171

Acrylic Resin

Acrylic Resin - Chapter 18.....	175
---------------------------------	-----

Cellulosic Plastic

Cellulose Propionate - Chapter 19.....	183
--	-----

Fluoroplastic

Fluoropolymer - Chapter 20.....	185
Ethylene-Tetrafluoroethylene Copolymer (ETFE) - Chapter 21.....	187
Fluorinated Ethylene-Propylene Copolymer (FEP) - Chapter 22.....	191
Perfluoroalkoxy Resin (PFA) - Chapter 23	193
Polytetrafluoroethylene (TFE) - Chapter 24.....	195
Polyvinylidene Fluoride (PVDF) - Chapter 25.....	197

Ionomer

Ionomer - Chapter 26.....	201
---------------------------	-----

Polyamide

Nylon - Chapter 27.....	203
Amorphous Nylon - Chapter 28	209
Nylon 12 - Chapter 29.....	211
Nylon 6 - Chapter 30.....	213
Nylon 612 - Chapter 31.....	217
Nylon 66 - Chapter 32.....	219
Polyarylamide - Chapter 33	223
Polyphthalamide (PPA) - Chapter 34.....	225

Polycarbonate

Polycarbonate (PC) - Chapter 35	231
---------------------------------------	-----

Polyester	
Thermoplastic Polyester - Chapter 36	265
Polybutylene Terephthalate (PBT) - Chapter 37.....	267
Polyethylene Terephthalate (PET) - Chapter 38.....	287
Polycyclohexylenedimethylene Ethylene Terephthalate (PETG) - Chapter 39	291
Liquid Crystal Polymer (LCP) - Chapter 40	293
Polyimide	
Polyimide - Chapter 41	297
Polyamideimide (PAI) - Chapter 42	301
Polyetherimide (PEI) - Chapter 43.....	305
Polyketone	
Polyaryletherketone (PAEK) - Chapter 44	313
Polyetheretherketone (PEEK) - Chapter 45.....	317
Polyetherketone (PEK) - Chapter 46	321
Polyolefin	
Polyethylene (PE) - Chapter 47	323
Low Density Polyethylene (LDPE) - Chapter 48.....	327
Medium Density Polyethylene (MDPE) - Chapter 49.....	329
High Density Polyethylene (HDPE) - Chapter 50.....	331
Ultrahigh Molecular Weight Polyethylene (UHMWPE) - Chapter 51	337
Polyethylene Copolymer - Chapter 52.....	341
Ethylene-Vinyl Acetate Copolymer (EVA) - Chapter 53.....	343
Polyethylene-Acrylic Acid Copolymer (EAA) - Chapter 54	345
Polymethylpentene (PMP) - Chapter 55	347
Polypropylene (PP) - Chapter 56.....	349
Polypropylene Copolymer (PP Copolymer) - Chapter 57	363
Polyphenylene Ether	
Polystyrene Modified Polyphenylene Ether (PPO and PPE) - Chapter 58.....	367
Polyphenylene Sulfide	
Polyphenylene Sulfide (PPS) - Chapter 59.....	383
Polysulfone	
Polysulfone (PSO) - Chapter 60	387
Polyethersulfone (PES) - Chapter 61	399
Styrenic Resin	
Acrylonitrile-Butadiene-Styrene Copolymer (ABS) - Chapter 62	407
Acrylonitrile-Styrene-Acrylate Copolymer (ASA) - Chapter 63.....	417
Polystyrene (PS) - Chapter 64.....	421
General Purpose Polystyrene (GPPS) - Chapter 65	425
Impact Resistant Polystyrene (IPS) - Chapter 66.....	427
Styrene-Acrylonitrile Copolymer (SAN) - Chapter 67.....	431
Styrene-Maleic Anhydride Copolymer (SMA) - Chapter 68	435
Styrene-Butadiene Copolymer (Styrene Butadiene) - Chapter 69.....	441
Polyurethane	
Rigid Thermoplastic Urethane (RTPU) - Chapter 70	443
Vinyl Resin	
Polyvinyl Chloride (PVC) - Chapter 71	445

Plastic Alloy

Acrylic Resin/Polyvinyl Chloride Alloy (Acrylic/PVC) - Chapter 72	453
Acrylonitrile-Butadiene-Styrene Copolymer/Polyvinyl Chloride Alloy (ABS/PVC) - Chapter 73.....	455
Polycarbonate/Acrylonitrile-Butadiene-Styrene Copolymer Alloy (PC/ABS) - Chapter 74.....	457
Polycarbonate/Polyester Alloy - Chapter 75	461
Polycarbonate/Polbutylene Terephthalate Alloy (PC/PBT) - Chapter 76.....	463
Polycarbonate/Polyethylene Terephthalate Alloy (PC/PET) - Chapter 77	465
Polycarbonate/Glycol Modified Polycyclohexylenedimethylene Terephthalate Alloy - Chapter 78.....	467
Polyethylene Terephthalate/Polbutylene Terephthalate Alloy (PET/PBT) - Chapter 79.....	469
Polystyrene Modified Polyphenylene Ether/Nylon 6 Alloy (PPE/Nylon) - Chapter 80	471
Polyvinyl Chloride Alloy (PVC Alloy) - Chapter 81.....	473

Thermoplastic Elastomers

Generic Thermoplastic Elastomer

Thermoplastic Elastomer (TPE) - Chapter 82.....	475
---	-----

Olefinic Thermoplastic Elastomer

Olefinic Thermoplastic Elastomer (TPO) - Chapter 83	477
---	-----

Polyester Thermoplastic Elastomer

Polyester Thermoplastic Elastomer (Polyester TPE) - Chapter 84.....	479
---	-----

Styrenic Thermoplastic Elastomer

Styrenic Thermoplastic Elastomer (Styrenic TPE) - Chapter 85.....	483
---	-----

Urethane Thermoplastic Elastomer

Urethane Thermoplastic Elastomer (TPUR) - Chapter 86	485
--	-----

Thermoplastic Polyester-Polyurethane Elastomer (TPAU) - Chapter 87.....	487
---	-----

Thermoplastic Polyether-Polyurethane Elastomer (TPEU) - Chapter 88.....	489
---	-----

Vinyl Thermoplastic Elastomer

Polyvinyl Chloride Polyol (pPVC) - Chapter 89.....	491
--	-----

Thermosets

Diallyl Phthalate Polymer

Diallyl Phthalate Polymer (DAP) - Chapter 90.....	495
---	-----

Epoxy Resin

Epoxy Resin - Chapter 91.....	497
-------------------------------	-----

Phenolic Resin

Phenol-Formaldehyde Copolymer - Chapter 92.....	499
---	-----

Polyester

Thermoset Polyester - Chapter 93.....	501
---------------------------------------	-----

Reaction Injection Molding System (RIM)

Polyurethane Reaction Injection Molding System (PU RIM) - Chapter 94	503
--	-----

Vinyl Ester

Vinyl Ester Resin - Chapter 95	505
--------------------------------------	-----

Rubbers

Ethylene Propylene Rubber (EPR)	
Ethylene-Propylene-Diene Copolymer (EPDM) - Chapter 96.....	507
Fluoroelastomer	
Vinylidene Fluoride-Hexafluoropropylene Copolymer (FKM) - Chapter 97	509
Polyurethane	
Urethane (PU) - Chapter 98.....	511
Rubber Alloy	
PE Copolymer/ Fluoroelastomer Alloy - Chapter 99.....	513

Appendices

Glossary of Terms	515
-------------------------	-----

Indicies

Reference Index	551
Figure Index.....	561
Table Index.....	569
Supplier Directory	573
General Index	579
